EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows: the title has been changed to "Liquid crystal projector with different shaped housing for each liquid crystal panel dependent on color."

DETAILED ACTION

Allowable Subject Matter

Claims 6-12 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claims 6-12, the previous rejection of the claims in view of Konuma and Menard taught a light source, a plurality of electro-optical units a projection optical system that projects light emitted from the electro-optical unit and first case that contains at least one of the electro-optical units. The rejection relied on Menard to teach a second case having a different shape compared to the first case that contained electro-optical units not contained in the first case and the shape corresponding to the type of incident light or position of the case relative to the optical system or the projection system. The previous rejection relied on a cooling element taught by the references that is spaced close to one electro-optical element as opposed to another, which would have resulted in a cooling imbalance across the device. However, the prior art failed to recognize

such a temperature gradient in the device, and if so whether this temperature gradient was significant enough to cause a problem, which would affected the reliability of the system. The previous rejection is withdrawn.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
